

React Module

1st to 8th class

Day-1-> React EcoSystem

Day-2->CSS, SCSS / Bootstrap / React-bootstrap

Day-3-> Passing Data between Parent component and child component / JSX,React.Fragment/ State and useState ()

Day-4-> Show array methods in component/ Event Handling/Handling Dynamic Content “The JavaScript Way”/ List, state and Keys

Day-5-> Pure Component vs. ShouldComponent

Day-6-> Pure Component vs. ShouldComponent

Day7-> useEffect data fetch / Conditionally run Effects

Day-8-> practice fake api

2nd 8th Days Class

Day-9-> Controlled vs. uncontrolled components /usememo/useCallback/react.memo

Day-10, 11-> Routes & Router Module / React-router vs. react-router-dom / >Working with Multiple Components / Navigation with Router Links

Day-12->Switching between pages /Routes with Value Passing

Day-13->Parameterised Route (useParams) / Lazy loading /Creating a custom Dynamic input component

Day-14, 15->mui

Day-16,17-> Handling user Input /Handling Form submission(Custom validation and Hooks form both)and POST api handling

Day-18-> Adding validation to check user input. / Outputting validation Error Messages,

After 16 days Class:-

Day- 19-> Introduction & How HTTP Request work in SPA / Sending GET/ POST/ PUT/DELETE Requests.

Day-20,21-> Sending GET/ POST/ PUT/DELETE Requests.

Day-22,23-> React a crud op json server

Day -24-> Handling Errors Locally

Day- 25-> Axios interceptor concept / Axios Instance

Day - 26-> Creating a Sign-Up Page

Day- 27-> use Context Hook and its usage

Day -28->use Context Hook and its usage

Day -29,30->use Reducer Hook and its usage

Day-31-> Redux Introduction module / Explain about architecture

Day-32->Setting up reducer , store ,Connecting react to redux

Day-33->Dispatching actions from within the component

Day-34->Passing and Retrieving data with action

Day -35->Updating state and arrays immutably

Day -36->Combining multiple Reducers

Day-37->Understanding state Types

Day-38,39->api handle Using Redux toolkit

Day-40->practice Set

Day-41->Query nstallation and file structure

Day-42->Data fetching with react query

Day-43->Pagination with react query

Day-44->Cache api response with react query

Day-45->React query vs React redux

Day-46->practice set

Day-47->How to install Next js /File structure

Day-48->Routing

Day-49->Pages and Layouts

Day-50->Dynamic Routes

Day-51->Linking and Navigating / Custom App/Custom Document

Day-52->Custom Errors/API Routes / Internationalization/Authenticating

Day-53,54->Middleware

Day-55->Server-side Rendering (SSR)/Static Site Generation (SSG)/Incremental Static Regeneration (ISR)

Day-56->Automatic Static Optimization/Client-side Rendering (CSR)

Day-57->Data fetching/getStaticProps/getStaticPaths

Day-58->Forms and Mutations

Day-59->getServerSideProps/Incremental Static Regeneration /Client-side Fetching

Day-60->Optimize/Images/Fonts/ Scripts/Static Assets/Lazy Loading/Next.config.js advance set up

Day-61->practice set
